Neutralizing the Effects of War: Psychosocial Support for TRC Public Hearing Participants
Torture treatment centers help survivors heal. The Center for Victims of Torture was started in 1985.
Provides a multidisciplinary approach to treatment and services:

- Rehabilitative treatment
- Training
- Research
- Public policy
According to Amnesty International, more than 100 countries worldwide systematically practice torture against their own civilian populations.
Region of Origin, CVT clients
1985-2004

- Africa: 71%
- Asia: 15%
- Middle East: 6%
- Europe: 4%
- North America: 3%
- South America: 1%
What is happening to your parishioners who have survived civil war?
Check on yourself throughout this training:

Emotional or physical reactions are **NORMAL**.
Severe, repeated, and/or prolonged exposure to violent events of war
Refugee stages: The Triple Trauma Paradigm

Pre-flight | Flight | Resettlement

© Adapted by the Center for Victims of Torture
Elements of Trauma

- Life threatening
- Unpredictable
- Out of the person’s control
- Stress is extreme
Normal Reactions to Stress

- Fight
- Flight
- Freeze

- Learning difficulties
- Sexual dysfunction
- Depression
- PTSD, other anxiety disorders
Depression

- Feeling sad or angry a lot
- Trouble thinking
- Feeling worthless
- No hope
- Feeling guilty a lot
- Appetite problems
- Sleeping problems
- Wishing for death
Posttraumatic Stress Disorder

Symptoms fall in three main categories:

– Re-experiencing
– Avoidance/Numbing
– Hyper-arousal
Triggers for PTSD

- Certain words, sights, sounds, or smells may trigger response.
- Person may not seem “present”.
Effects on Families

- Loss of cultural and social supports
- Parent-child role reversal
- Conflict: marital, intergenerational, ethnic/tribal/clan (broken bonds)

© Center for Victims of Torture
Effects on the Community and Culture

- Fear
- Distrust
- Blame
- Apathy
- Isolation
- Strife
- Helplessness

© Center for Victims of Torture
Effects of War on Faith

- Strengthening one’s faith
- Questioning a supreme being
- Loss of faith
Why can’t we just forget about it and go on with our lives?
How can faith leaders help?
Torture, War Trauma and Terrorism affect **FIVE** basic human needs.

- The need to feel **safe**
- The need to **trust**
- The need to feel of **value** (self worth)
- The need to feel **close to others**
- The need to feel **some control** over our lives
Clergy with parishioners from countries in conflict can:

+ Work to develop trust with members of congregation.
+ Recognize symptoms “out of control”.
+ Assure confidentiality.
+ Find opportunities that give responsibility.
+ Give choices.
+ Use community resources.
+ Offer opportunities to have fun.
+ Be aware of secondary traumatization.
Dealing with Disclosure

As traumatized refugees form trusting relationships, they may share pain, losses and suffering. The disclosure represents an opportunity for them to be heard and believed.
Dealing with Disclosure of Trauma

Adopted from the “Guide to Working with Youth people who are Refugees”
Victorian foundation for Survivors or Torture, Australia

- When intense emotions are expressed, you act as a buffer against a parishioner being overwhelmed.
- Disclosure can alternate between numbing and denial.
- Stay close to his way of coping and not challenge it.
- You can not assume what is the most traumatic event for a person.
Acknowledgement of the traumatic experience and feelings is foremost.

Closing the discussion when traumatic material has been expressed requires sensitivity.

- Emphasize that the response is understandable (i.e., normalize).
- Acknowledge her bravery in talking about difficult experiences and feelings.
- Suggest that he will again feel sad, angry or worried.
- Suggest that when this happens she shares those feelings and thoughts with someone.
Dealing with Anger

- Understand the cause of anger.
- Allow her space and time to express herself further.
- Suggest expressing the violation appropriately (making a complaint, writing an editor).
- Use an intermediary, if conflict is with you.
Messages for survivors:

- Welcome; I’m glad you are safe and here in our community.
- You will have much to contribute.
- I know you have gone through many bad experiences.
- Most war survivors are still feeling the effects of these experiences. This is normal.
- I know you were not always a refugee. You have lost much.
Spiritual Leaders

Be informed. Who has the resources? How can you access these?

Communicate and make connections. Take a strengths-based and problem-solving approach to challenges.
Community Leaders

- Raise awareness.
- Be an advocate for individuals.
- Be an advocate for change in systems.
Community building and interventions need to focus in all possible ways on enlarging the sense of community.

Source: Based on work by Mirjana Bijelic, CVT, 1999
Refer, as indicated

- Psychotherapy: individual/family/group
- Pharmacotherapy
- Primary medical and dental care
- Corrective medical treatment
- Physiotherapy, bodywork, etc.
- Traditional healing methods
- Social services
- Community projects, programs
REFERRAL RESOURCES

- Make a list!
- Keep it current.
- Use it often.
- Accompaniment - take people to the resources.
The Journey of Healing - what would it look like in your:

- Family?
- Community?
- Place of worship?
- Self?
